

10 以内的连加、连减、加减混合 (1)

姓名: _____

一、计算.

例: $\frac{5+1+2}{6} = 8$

$4+3+3=$

$6-3-3=$

$2+4+2=$

$9-2-2=$

$8-1-3=$

$10-5-3=$

$3+5+2=$

$8-2-3=$

$3+3-8=$

$6-3+8=$

$8+1-7=$

$3-2+9=$

$3+3-3=$

$10-4+1=$

$7-3+3=$

$3+5=6+ ()$

$9-3=3+ ()$

$1+7=9- ()$

$5+5=2+ ()$

$4 \xrightarrow{+2} \square \xrightarrow{-3} \square \xrightarrow{+5} \square \xrightarrow{-6} \square$

$10 \xrightarrow{-6} \square \xrightarrow{-3} \square \xrightarrow{+5} \square \xrightarrow{-3} \square$

二、看图列算式.

$\square \bigcirc \square \bigcirc \square = \square$

$\square \bigcirc \square \bigcirc \square = \square$

$\square \bigcirc \square \bigcirc \square = \square$

$\square \bigcirc \square \bigcirc \square = \square$

$\square \bigcirc \square \bigcirc \square = \square$

$\square \bigcirc \square \bigcirc \square = \square$

$\square \bigcirc \square \bigcirc \square = \square$

一、看图列算式

$$\square \bigcirc \square \bigcirc \square = \square$$

$$\square \bigcirc \square \bigcirc \square = \square$$

$$\square \bigcirc \square \bigcirc \square = \square$$

$$\square \bigcirc \square \bigcirc \square = \square$$

$$\square \bigcirc \square \bigcirc \square = \square$$

$$\square \bigcirc \square \bigcirc \square = \square$$

$$\square \bigcirc \square \bigcirc \square = \square$$

$$\square \bigcirc \square \bigcirc \square = \square$$

$$\square \bigcirc \square \bigcirc \square = \square$$

$$\square \bigcirc \square \bigcirc \square = \square$$

$$\square \bigcirc \square \bigcirc \square = \square$$
