20. The English language is full of idioms which are thought _____ (come) from football.

三、阅读理解：(10')

Beijing resident Hou Lixin started eating meal replacement products in February when she wanted to lose weight. She bought various meal replacement products online and ate them for more than a month.

"Most of them don't taste good, but at least they have low calories and are convenient to buy, store and cook," she said, adding the product she consumed gave a strong sense of fullness.

Hou is by no means alone. Meal replacement products, or substitutes for regular meals that can fill you up with low-calorie intakes, appear as a potential big market in China, driven by Chinese consumer' demand for products that can help in weight control and offer convenience, experts said.

The most common meal replacement products include powders, liquids, shakes, porridges and energy bars containing fiber, protein, vitamin, minerals and other nutritious content.

The meal replacement market is at the early stage of competition and there is big room for future development, like in the United States and Japan. Euromonitor International, a market research company, said sales revenue of meal replacement products in China hit 57.17 billion yuan in 2017 and is expected to reach 120 billion yuan by 2022. More fast-moving consumer goods giants are partaking in the market action. PepsiCo's oat brand Quaker released a new shake product in June. A major Chinese snack brand Bestore released 27 meal replacement products in August.

Jia Jianbin, secretary general at Chinese Cereals and Oils Association, told CCTV reporter that despite its possible effectiveness that many people believe, this way of weight loss may bring greater harm as it breaks the balance of nutrition and food. As a result, it can only be a temporary move, not a long-term use.

“Cereal meal replacement powder, for example, is mainly composed of carbohydrates (碳水化合物), which have enough calories, but the vitamins and minerals are not enough. Instead, it is better to soak oatmeal (燕麦片) in milk, which may be more nutritious and more economical,” said Gu Zhongyi, a dietitian of the Beijing Dietetic Association. “Meal replacements can be an alternative for busy workers, but they are no substitute for a balanced diet, and try not to eat more than one meal a day.”

21. The author quotes the example of Hou Lixin to _____.

- A. show an efficient way to lose weight
- B. promote the meal replacement products
- C. introduce the topic of meal replacement products
- D. arouse readers' interest in the meal replacement products

22. Why are meal replacement products popular among many Chinese consumers?

- A. Because they are highly recommended by health experts.
- B. Because they are helpful to control weight and bring convenience.
- C. Because they have a large market share in the food market.
- D. Because they provide various forms and flavors for the consumers.

23. What does the underlined word “partaking” in Paragraph 5 mean?

- A. Participating.
- B. Advertising.
- C. Experimenting.
- D. Cooperating.

24. What attitude do Jia Jianbin and Gu Zhongyi have towards the meal replacement products?

- A. Cautious.
- B. Favorable.
- C. Disapproving.
- D. Confused.

四、七选五：(15')

Wilma Rudolf was born in Clarksville, Tennessee, in 1940. Compared with her brothers and sisters, Wilma was not a strong child. When she was very young, she got a disease called polio. Wilma's left leg began to have problems. (25)_____. When she pulled through, she couldn't even move her left leg. It seemed that she would never be able to walk. Wilma's family loved and helped her. Her mother wanted to give her a chance. Her mother and her sisters massaged her bad leg. The doctor put a brace on her leg for six years. Long years of treatment and exercise changed Wilma entirely. (26)_____

At high school Wilma started to run. Soon she won every race she ran. At age fifteen she prepared for the

national races. She won all the races. The next year, 1956, Wilma was in the Olympic Games in Australia.

(27)_____

In 1960 Wilma went to the Olympic Games in Italy. The weather was very hot just as it was in Tennessee. The Italians cheered for her. Wilma won the 100 meter, 200 meter, and the 400 meter relay. (28)_____

The victory was unusual for Wilma. From a girl of eight who could barely walk Wilma became a world champion. She had gone a long way. To win in the Olympic Games is the highest goal to millions of sportsmen and sportswomen. Only some of them have achieved the goal. To a disabled girl, to win in the Olympic Games is something of flying onto the moon. Wilma Rudolf was such a girl. (29)_____

In 1963 Wilma got her degree in education. That year she married her high school sweetheart, and now they have four children.

- A. One lucky day when she was twelve, the doctor took off the brace.
- B. Wilma Rudolf's illness prevented her from winning Olympic gold medals.
- C. Later she almost died of the serious illness.
- D. A beautiful mind that flowered in a disabled body.
- E. She set a good example to all the persons with disabilities.
- F. Wilma Rudolf was the first American woman to win three Olympic gold medals.
- G. Wilma came back with a bronze medal.

五、完型填空：(15')

When I tried out for the football team during the summer before 9th grade, I never imagined how important this sport would become in my life. Football is a 30 sport, at times almost painful, and practices really 31 a team's physical and mental limits. Without trust in my own ability and a strong sense of commitment, I would never have managed to continue after years of hard work as a player, and with countless 32.

In the first year, I played on the defensive line. This was an amazing 33 that gave me a great sense of achievement. But in the last game of the season, I was seriously injured. I was prohibited from any physical activities for six months. After going 34 a series of physical treatments, I returned to the field as a team captain. I practiced harder than ever to make up for my 35 time.

In September, during my junior year, my name was mentioned in the local newspaper as the key defensive lineman on the team. After playing a fantastic season, I was given the 36 of the Most Valuable Player.

37, my skills in football do not magically extend to other sports. During the winter break, I went on a snowboarding trip and seriously injured my right shoulder. I had to have four 38. Since I could not use my right arm for two months, I had to learn how to write and eat using my left hand.

39 life must go on. I knew that my own present efforts would decide my future, so I 40 the strict training program to build up strength and improve flexibility in my 41. After an eight-month recovery, I was back to the field playing football, the sport I 42.

In this sense, the world of football has taught me an important life lesson: 43 and commitment make what seems impossible 44. This lesson from football is the one that can be applied to every part of life.
